

Low Profile Slide Table Series MXF

ø8, ø12, ø16, ø20

Slim and compact style air slide table has parallel design for guide and cylinder.

Parallel design of guide and cylinder creates a slim and compact slide.

Model	Height x Width(mm)	Height comparison to MXS
MXF8	16 X 58	67%
MXF12	18.5 X 68	59%
MXF16	21 X 80	53%
MXF20	27 X 92	54%

Standard stroke adjustment

Stroke can be adjusted at each stroke end within 5mm each end and 10mm in total.

Covered stop bolt

Allows for neat appearance.

Body mounting (Body tapped)

Auto switch can be mounted

Auto switch is recessed in the groove to save space.

Slim body

Parallel arrangement of guide and cylinder achieves a thin cylinder profile.

Repeatability of attachment and unattachment

Positioning pin holes on table top allows precise and easy mounting to change work piece.

High rigidity/High precision

Cross roller guide allows smooth operation without vibration.

Optional porting

Lateral and axial piping from 2 directions is possible.

Stronger thread for mounting work

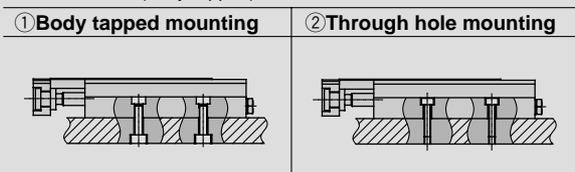

Helisert thread for mounting work

Repeatability of attachment and unattachment

Pin holes for positioning on bottom of slide allows precise and accurate mounting of actuator.

Body mounting (Body tapped)

Mounting can be done from 2 directions top side (through hole) and bottom side (body tapped).

Variations

Model	Bore size (mm)	Stroke (mm)					Auto switch
		10	20	30	50	75	
MXF8	8	●	●	●	●	●	●
MXF12	12		●	●	●	●	●
MXF16	16			●	●	●	●
MXF20	20				●	●	●

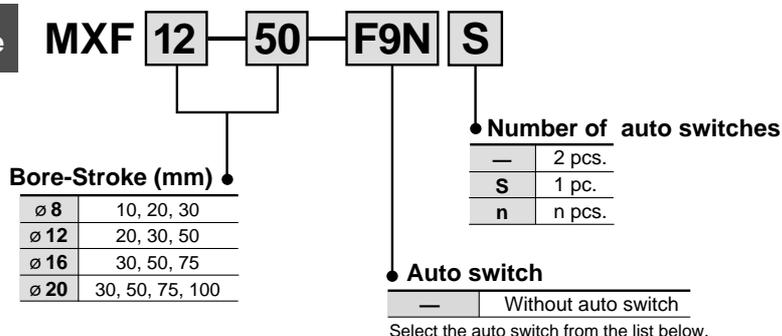

Auto switch options:
 Reed switch: D-A9□, D-A9□V
 Solid state switch: D-F9□, D-F9□V
 2 colour solid state switch: D-F9□W, D-F9□WV

Low Profile Slide Table Series *MXF*

How to Order

Low Profile Slide Table

How to Order Stroke Adjuster (Accessory)

* -X12 (Adjustable range 25mm) is not available for series MXF8/MXF12.
* -X11 and -X12 are not available as built-in product.

Applicable Auto Switches/Refer to p.5.3-2 for the detailed specifications on auto switches.

Style	Special function	Electrical entry	Indicator	Wiring (Output)	Load voltage			Auto switch model		Lead wire length		Applicable load	
					DC	AC		Electrical entry direction		0.5 (—)	3 (L)		
						24V	5V	100V or less	100V				
Reed switch	—	Grommet	No	2 wire	24V	5V	100V or less	A90V	A90	●	●	IC	Relay PLC

Series MXF

Table Deflection

Table deflection by pitch moment

Table pitch deflection due to static pitch moment applied at arrow for all strokes of slide table.

MXF 8

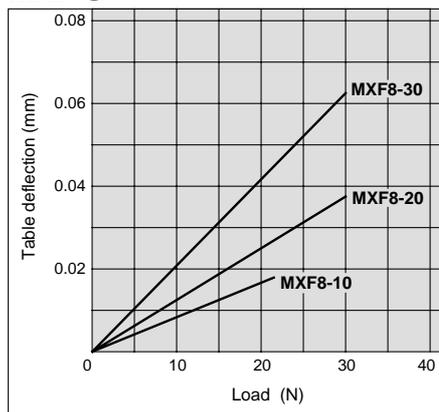

Table deflection by yaw moment

Table yaw deflection due to static yaw moment applied at arrow for all strokes of slide table.

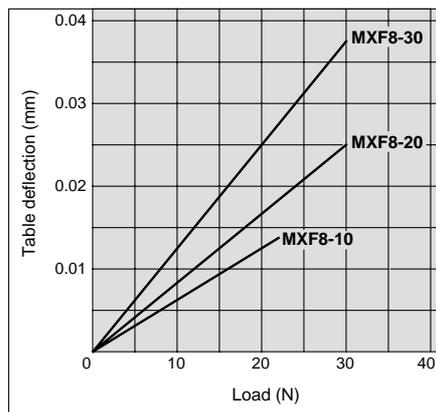

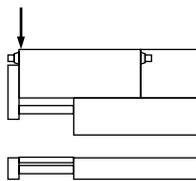

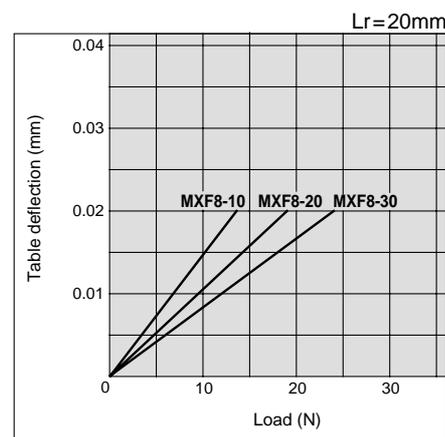

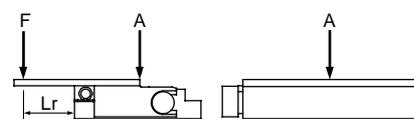

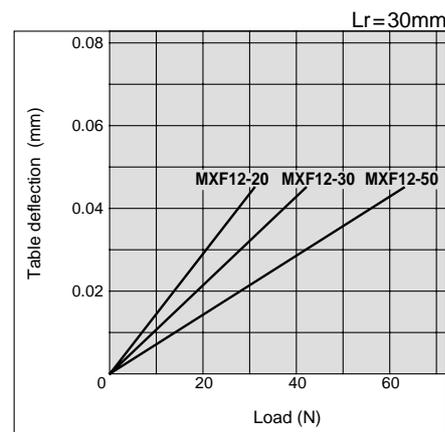

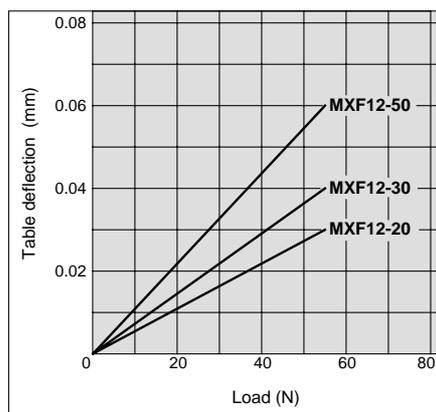

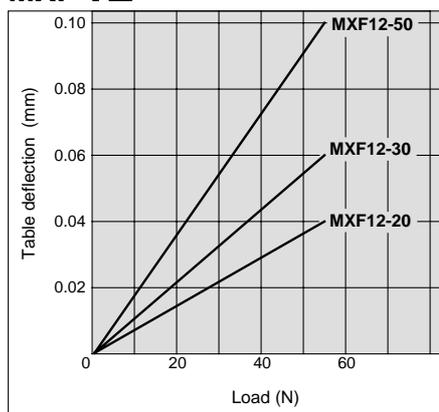

Table deflection by roll moment

Table roll deflection arrow A due to static roll moment applied at arrow F when Lr=20mm and table is retracted.

MXF 12

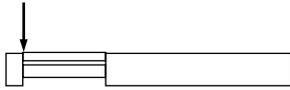

Allowable static moment

Model	Stroke (mm)	Allowable static moment: Mp, My, Mr (Nm)						Correction value for moment centre distance (mm)					
		10	20	30	50	75	100	Cp1	Cp2	Cy1	Cy2	Cr1	Cr2
MXF8	16	0.56	0.78	0.98	—	—	—	6 ⁽¹⁾	10	6 ⁽¹⁾	21	21	10
MXF12	16	—	1.65	2.22	3.34	—	—	10	11	10	23	23	11
MXF16	16	—	—	3.41	5.69	7.96	—	10	12	10	28	28	12
MXF20	16	—	—	6.66	9.14	13.70	18.27	11	17	11	34	34	17

Note 1) 16mm only for MXF8-10.

Table deflection by pitch moment

Table pitch deflection due to static pitch moment applied at arrow for all strokes of slide table.

MXF 16

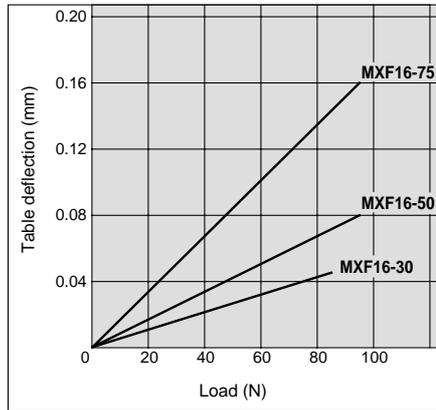

Table deflection by yaw moment

Table yaw deflection due to static yaw moment applied at arrow for all strokes of slide table.

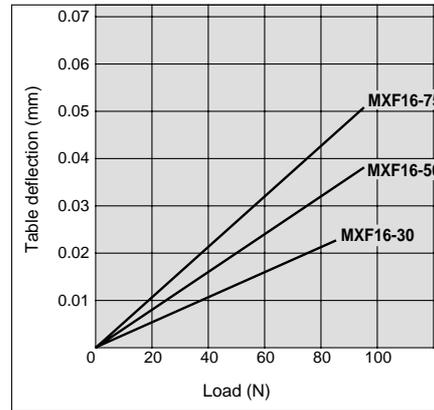

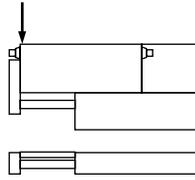

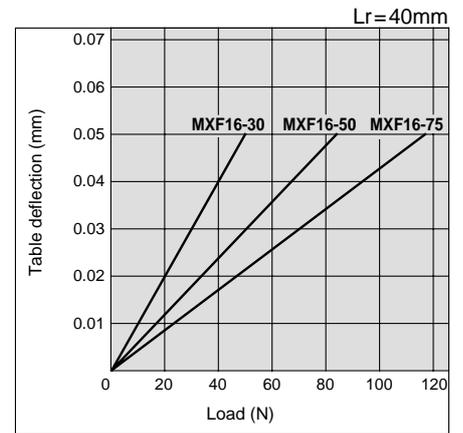

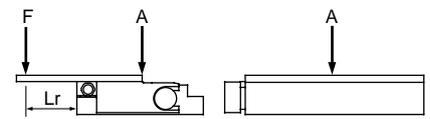

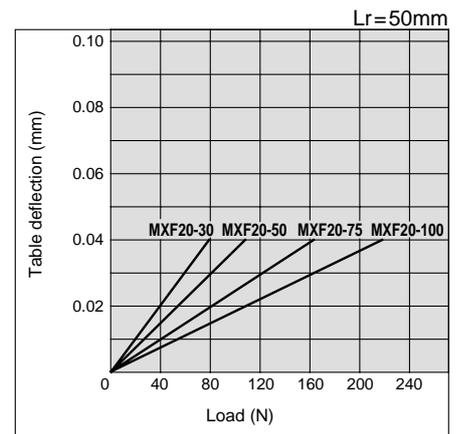

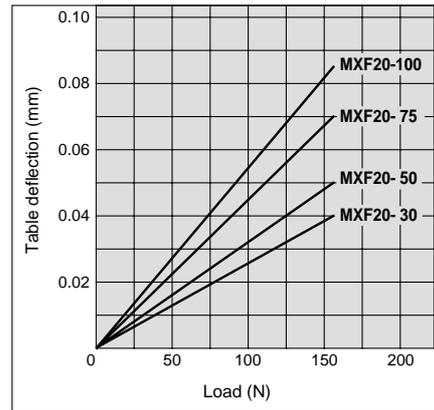

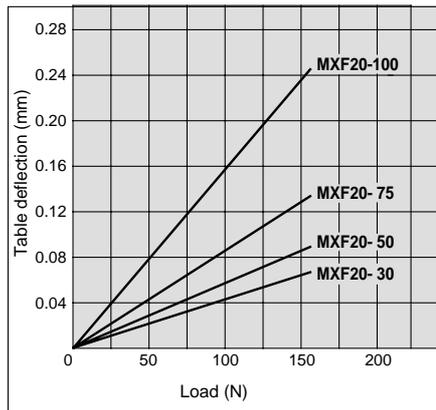

Table deflection by roll moment

Table roll deflection arrow A due to static roll moment applied at arrow F when Lr=20mm and table is retracted.

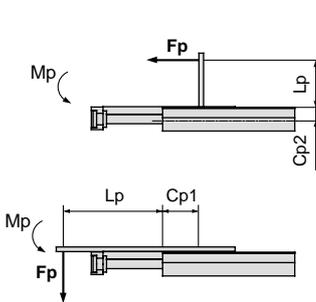

MXF 20

Formula for calculation of allowable static load, Fp, Fy and Fr

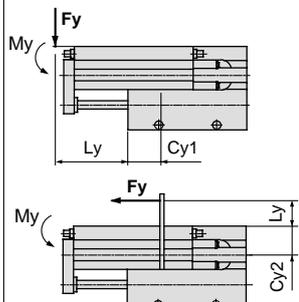

When pitch moment is applied

$$F_p = \frac{M_p \times 1000}{(L_p + C_p)} \text{ (N)}$$

Lp: Distance between body and load point(mm)
Cp: Correction value for moment center distance(mm)

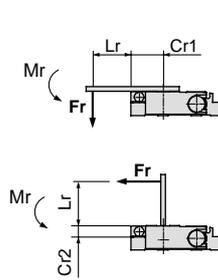

When yaw moment is applied

$$F_y = \frac{M_y \times 1000}{(L_y + C_y)} \text{ (N)}$$

Ly: Distance between body and load point(mm)
Cy: Correction value for moment center distance(mm)

When roll moment is applied

$$F_r = \frac{M_r \times 1000}{(L_r + C_r)} \text{ (N)}$$

Lr: Distance between body and load point(mm)
Cr: Correction value for moment center distance(mm)

⚠️ Precaution

Selection

⚠️ Caution

- ① If a table is stopped at an intermediate position by an external stopper, avoid ejection. If ejection occurs, it causes damage. If a slide table is stopped at an intermediate position by an external stopper and then forwarded to the front, draw back the intermediate stopper after supplying pressure to allow the slide table to return to the back for an instant, then supply pressure to the opposite port to operate the slide table.
- ② Do not use in circumstances that excessive, external forces or impacts would be applied. These conditions could lead to malfunctions.
- ③ Portable weight should be 1/10 or less of the allowable static load in consideration of the overhang or inertia.

Guide for Operation of Slide Table MXF

⚠ Precaution

Be sure to read before handling.
Refer to p.0-39 to 0-43 for Safety
Instructions and common precautions.

Mounting

⚠ Caution

- ① Do not scratch or dent the mounting side of the body, table or end plate. It causes play in the guide section and increases sliding resistance.
- ② Do not apply scratch or dent the forward side of the rail or guide. It can cause play of the guide section and increases sliding resistance.
- ③ Do not bring into close contact with objects which would be influenced by a magnetic field. As an air slide table has magnets built-in, do not allow close contact with magnetic disks, magnetic cards or magnetic tapes. Data may be erased.
- ④ When mounting an air slide table, screws of appropriate length should be used and tightened properly within the maximum tightening torque. If screws are tightened beyond designed limits, malfunction may occur. If they are tightened insufficiently, it may result in sliding from its position.
- ⑤ Be careful when adjusting stroke not to allow cylinder end plate to bottom out against cylinder body.

Positioning

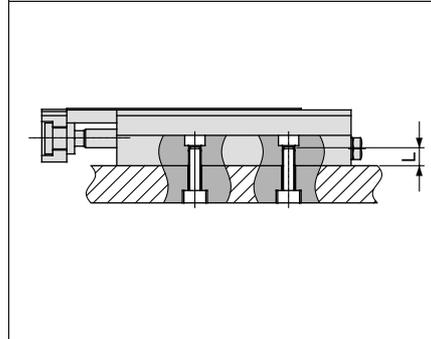

⚠ Caution

- ① Pin holes are designed to allow accurate and repeated mounting.
- * Location of pin holes on top and bottom are not identical.

Slide Table Mounting

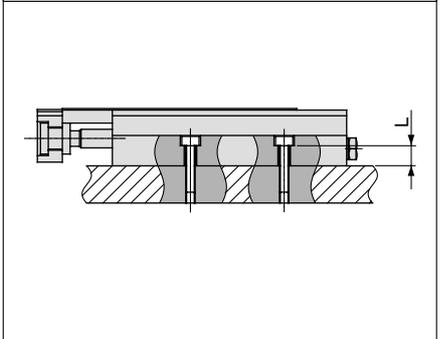

The slide table can be mounted from 2 directions. Select the best direction according to your application.

① Body tapped mounting

Model	Bolt used	Max. torque (Nm)	Max. screw-in depth L(mm)
MXF8	M4 X 0.7	2.1	4.7
MXF12	M4 X 0.7	2.1	6.5
MXF16	M5 X 0.8	4.4	6.7
MXF20	M5 X 0.8	4.4	8.5

② Through hole mounting

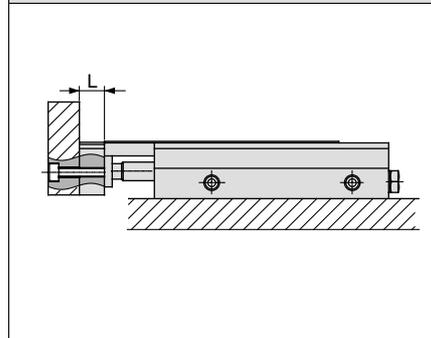

Model	Bolt used	Max. torque (Nm)	Max. screw-in depth L(mm)
MXF8	M3 X 0.5	1.2	4.7
MXF12	M3 X 0.5	1.2	6.5
MXF16	M4 X 0.7	2.8	6.7
MXF20	M4 X 0.7	2.8	8.5

⚠ **Caution** 0.02mm or less of flatness is recommended. An uneven mounting surface may cause play and increase sliding resistance.

Mounting of Work Piece

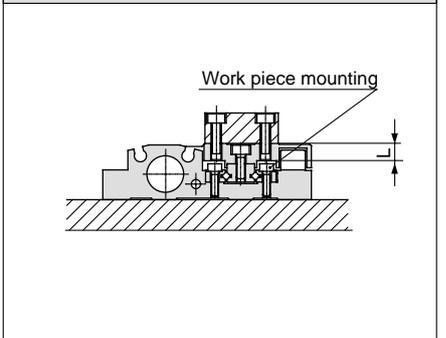

Work can be mounted on two sides of the air slide table.

① Front face mounting

Model	Bolt used	Max. torque (Nm)	Max. screw-in depth L(mm)
MXF8	M3 X 0.5	0.9	6
MXF12	M3 X 0.5	0.9	6
MXF16	M4 X 0.7	2.1	10
MXF20	M5 X 0.8	4.4	12

② Top face mounting

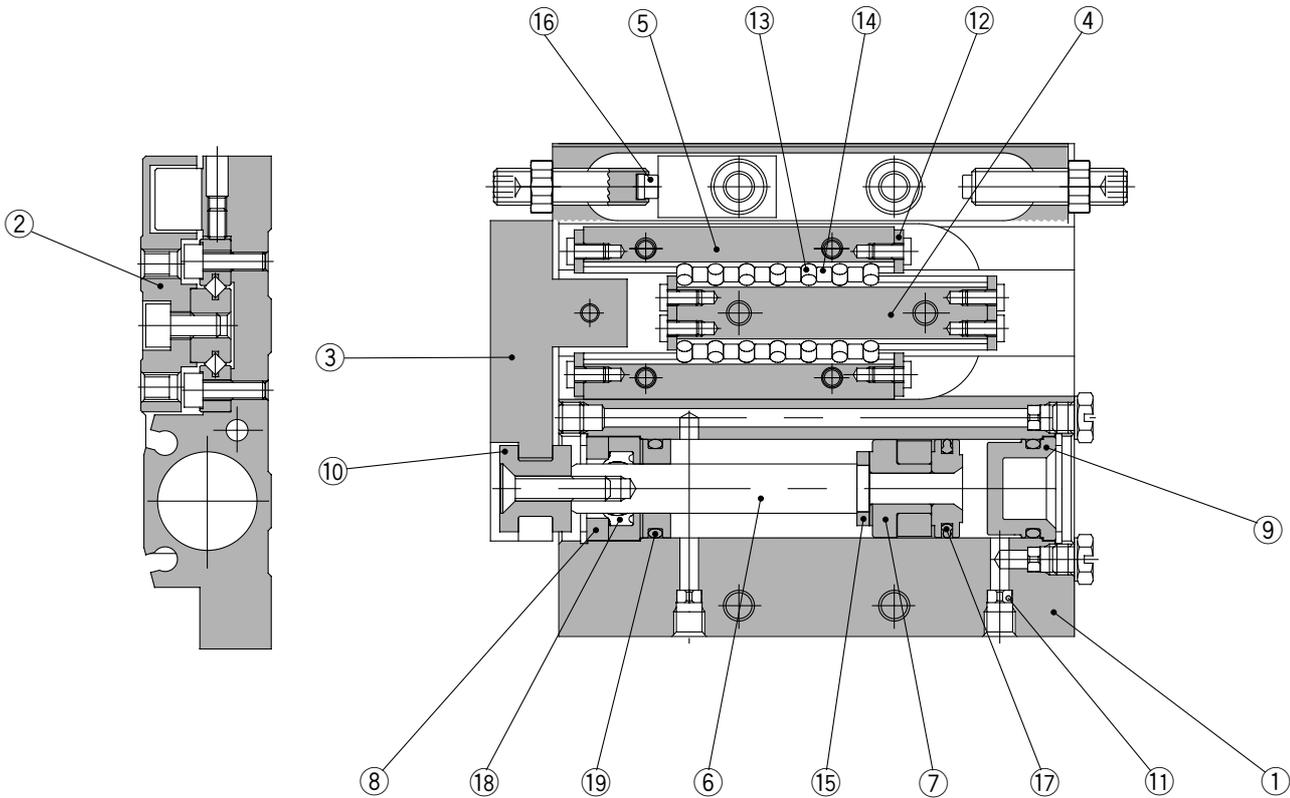

Model	Bolt used	Max. torque (Nm)	Max. screw-in depth L(mm)
MXF8	M3 X 0.5	0.9	6.5
MXF12	M3 X 0.5	0.9	5.5
MXF16	M4 X 0.7	2.1	6.5
MXF20	M5 X 0.8	4.4	9.5

⚠ Caution

Use bolts at least 0.5mm shorter than maximum thread depth to prevent bolts from contacting the end plate. If the bolts are too long, they hit the end plate and may cause malfunctions.

Construction

Component Parts

No.	Description	Material	Note
①	Body	Aluminum alloy	Hard anodized
②	Table	Aluminum alloy	Hard anodized
③	End plate	Aluminum alloy	Hard anodized
④	Rail	Carbon tool steel	Heat treatment
⑤	Guide	Carbon tool steel	Heat treatment
